

POSITION DESCRIPTION

Position Title: **PRODUCT ENGINEER**

Reports To: Product Director

PURPOSE

ComplyMD is an innovative approach that provides surgical documentation in the Operating Room to optimize the physician's efficiency. ComplyMD is looking for Smart, Creative, Engineers who wants to be apart of something Big. We're looking for someone who gets excited about solving problems and enjoys working with a small, highly motivated team.

Using Agile methods, Iterative and Test Driven Development you will be expected to contribute to the next generation of the ComplyMD Solution. Expect to share your ideas, talents and for your voice to be heard. Healthcare domain knowledge is preferred but is not a requirement.

WHY YOU WANT TO WORK WITH US

ComplyMD is a high-growth company located downtown in Birmingham's Innovation Depot. ComplyMD has strong support of hospitals utilizing our solution and is highly configurable for all surgical disciplines. We have a strong asset base of intellectual property, a passionate team, reference customers as well as a broader set of "unidentified patient" procedure and diagnostic data for long-term data mining. Corporate goodwill does not come cheap; ComplyMD has invested our talents in building an enthusiastic client base that champion our results.

REQUIRED EXPERIENCE/SKILLS

- Strong working knowledge of Object-Oriented design and Software as a Service solution architectures, we use Ruby on Rails, Rails 3
- Strong database design and development skills, we use MySQL
- Solid understanding of a typical web development life cycle, including development, testing, staging, deployment and monitoring
- Working knowledge of Javascript and Javascript frameworks (jQuery, Backbone.js)
- Experience with testing frameworks (RSpec, Selenium)

DESIRED EXPERIENCE/SKILLS

- Web design/front-end skills and creativity
- Server Administration, Linux
- Data Analytics experience
- Healthcare industry or medical knowledge; HL7 is a plus
- Information Security

Please provide the following if applicable: Personal website(s) or blog, projects you have worked on, Github username
